

Internships

Internships are widely regarded to be the key to success in obtaining employment upon graduation in today's job market. Why? Because internships provide students with the professional experience that can set them apart from the competition. Preparing yourself academically is great, but an internship or two, in combination with the right skills and profile, can land you the job after you graduate. The websites below are helpful tools to utilize in researching internship opportunities. Consult with your academic advisor and other faculty members you work closely with as well. Bottom line - start your search early and remain persistent to be successful!
