REDLANDS
YOURS FOR THE MAKING
In the heart of sunny Southern California, where majestic mountain vistas greet you at every turn, palm trees stretch to meet the sky and the fragrance of orange blossoms fills the air, the University of Redlands campus stands out as among the most beautiful in the West.

Our 160-acre campus features a mix of classic and contemporary architecture, lush green trees and friendly faces wherever you go. A mile away, the historic city of Redlands’ vibrant downtown offers local eateries, coffee shops and a weekly year-round farmers market. With an average daily temperature of 70 degrees and easy access to the desert, mountains and ocean, Redlands is an idyllic place to get the most from your college experience.

There’s a vibe at Redlands that welcomes you with open arms and inspires you to try new things. An atmosphere that invites you to take the time to find what’s meaningful and encourages you to pursue it with passion. A community that enjoys being together and shares a commitment to understanding the world and making a difference.

We invite you to learn more about our community and the opportunities and experiences available to you that will prepare you for the life you want to lead.

The University of Redlands—it’s yours for the making.
It’s this unique combination that enables you to pursue a traditional liberal arts program such as English, history, or psychology and couple it with a pre-professional offering such as our signature programs in communicative disorders or global business. Or to design your own degree through our innovative Johnston Center for Integrative Studies, one of the first and longest running alternative interdisciplinary programs in the nation.

**Take Your Liberal Arts Foundation Beyond the Classroom**

With the support of professors, our Bulldog Alumni Network and Office of Professional Development, our students pursue their interests through a variety of internships and research opportunities:

- Coordinate scripts and edit footage for production as an NBC News intern.
- Conduct field research to document conservation efforts at Zion National Park.
- Design after-school activities through a service learning project.
- Master French while exploring the history of art and politics firsthand in Paris.

The Fulbright Program is the U.S. government’s flagship international exchange program. This highly competitive and prestigious program selects the nation’s best and brightest for overseas research or teaching.

**Fulbright Facts:**

- Redlands has been recognized as a “Top Producer of Fulbright Students” for the 2015-16 year, one of only 25 master’s institutions to share the prestigious designation.
- Redlands Fulbright Students have traveled to Germany, Mexico, New Zealand, Guatemala, Norway, Spain, Japan, Morocco and Taiwan.
- Our Fulbright Students have majored in global business, international studies, languages, biology, communicative disorders and music.

"Redlands manages to be a liberal arts college, pre-professional institute, and alternative college all in one." — *Fiske Guide to Colleges*
Intensive or innovative, down the street or around the world—enjoy a one-month course of study that lets you concentrate on something you love or experiment with something new altogether in an on-campus or travel course, such as:

- Wildlife and History in Ethiopia
- Environmental Field Study in the Sierra Nevada Mountains
- Internet Afterlife
- Policymaking in Washington, D.C.
- Explorations in Sustainable Development in Palau
- Reading Comics and Culture
- Cultural and Service Learning in Guatemala
- German Expressionist Film in Austria
- Urban Gardening

Something for Everyone

You can take courses spanning a vast array of interests:

- Consider the history of inequality and investigate solutions for it today in Coming to America: Immigration, Race and Ethnicity in American Literature.
- Take a closer look (including through a microscope) at some of the living things we can’t see in Exploring Microbes: The Good, the Bad, and the Tiny.
- Understand the cultural and practical aspects of global business in International Negotiations.
- Explore your creativity in Multimedia Design and Game Programming.
With relevant learning in every field of study, you’ll construct the knowledge and cultivate the skills to serve you well in everything you do.

Uncover Your Dream Job

**EVAN SANFORD ’17**
*Media and Visual Culture Studies major, Business Administration minor*

As a first-year student, I asked about resurrecting the then-shuttered radio station. Redlands responded by giving me the key to the building!

I spent the next two years learning everything I could about running a radio station, from raising the funds and renovating the space to staffing the station and creating content. As a result, student-run radio has been rebuilt and rebranded, and today KDAWG delivers music and news to listeners near and far.

In addition to serving as station manager behind the scenes, I’ve been able to host my own show, “Inside the Studio,” and I’ve interviewed people from the campus and local community along with high profile subjects, like journalist James Fallows, actor Mario Lopez and anthropologist Jane Goodall. Through these experiences I’ve been able to connect the dots between media, business and my interest in working with people, and I’m excited about what the future holds.

Become a Leader Who Makes a Difference

**MARY JANE ANDREAS ’18**
*Race and Ethnic Studies major with an emphasis in Native American Studies*

The Native Student Program at Redlands reached out to me during high school and helped me through the stress of the college search. Once I arrived on campus, the Center for Diversity and Inclusion felt like a home-away-from-home. As a Paiute woman, activities like the annual Powwow and Native Fitness and Motivation Day let me enjoy being around others who share my interests and help me to embrace my own culture when I’m away from my home and family.

I knew I wanted to serve others in the same way the Native Student Program supported me, so I began to focus my studies in this area and sought a position tutoring students at Sherman Indian High School, a boarding school for Native students. For two years I have had the opportunity to get to know the students there, serving as a role model and mentor for them.

These experiences, combined with my coursework, have taught me a lot about myself and my ability to work with and lead others. I enjoy preserving my culture and making a difference. I look forward to continuing my work after graduation in a career working with Native youth through local tribes.
Expand Your Global Outlook

GABRIELLE KANTER ’17
Political Science major and Pre-Law

Before I came to Redlands, I had no prior international travel experience and was terrified of the idea. My advisor convinced me to take a May Term in Salzburg, Austria, to study the politics of Eastern Europe. While there, I learned to embrace the excitement of being out of my comfort zone and was inspired to pursue a full semester of study at Oxford University in the United Kingdom the following year.

For me, there is something crucial about experiencing things firsthand—and not just the historic buildings, different food or lifestyles of each culture. In my case, a visit to the International Criminal Court in the Netherlands helped me to see the important role of multinational, independent courts in upholding global human rights in an entirely new way. It sparked new academic interests for me, and after graduation my first priority is law school.

Immersing myself in new situations and interacting with people from around the world have helped me become clever, open-minded and resourceful. Mostly, I’ve learned to be fearless when opportunities come my way. Regardless of what I do professionally, I’ll be more successful because of the person I’ve become through study abroad.

GABRIELLE KANTER
LAS VEGAS, NV

JACOB KHURI ’17
Biochemistry major, Religious Studies minor

I’ve been fortunate to conduct research across the global health spectrum. As a research assistant in the field of urology at Loma Linda University Medical Center, I helped construct a model for the ideal ureteral guide wire. While working with the epidemiology department at the University of Buffalo in New York, I investigated the impact of food insecurity levels among Iraqi, Somali and Burmese refugees resettled in the U.S.

More recently, in a collaboration with Redlands chemistry professor Dr. Acquaye, I’ve been synthesizing new ruthenium complexes—as potential anti-cancer agents—that will be characterized and used in reactivity studies. This particular research has opened up the field of medicinal chemistry to me, and I plan to pursue this along with medical school.

Each of these opportunities has benefited me, and my work ethic has grown tremendously. I’ve accumulated experiences normally reserved for graduate students—working with a variety of mentors, co-authoring papers, presenting my findings to other scientists. More importantly, my research experience has better defined my career goals and the difference I want to make.

JACOB KHURI
AMMAN, JORDAN
YOURS TO PERSONALIZE

With more than **50** programs of study to choose from, you can make your learning ...

**RIGOROUS.** Guided by faculty experts, you’ll be challenged to invest time and intellectual capital pursuing answers to difficult questions—in class, through research and in your own capstone graduation project.

**SPECIALIZED.** You can focus on in-demand and targeted fields like accounting, spatial studies and theatre business.

**INTERCONNECTED.** In majors like environmental studies, public policy, and media and visual culture studies you are encouraged to examine the relationship between different disciplines and put your learning into practice. You could also customize your coursework to suit your goals, blending business and journalism with French, for instance, or chemistry and art with pre-law.

**PRE-PROFESSIONAL.** Prepare for medical, law or graduate school with integrated studies in our engineering 3-2 program, pre-law and pre-med/pre-health.

*Learn more about our programs of study at www.redlands.edu/study*
Do you have an extraordinarily innovative vision for your education?
The Johnston Center for Integrative Studies offers an education like no other. Each Johnston student forges a unique path in the context of faculty mentorship and an intentional community. This living-learning center features seminar-style classes, faculty-student co-teaching and learning and a self-governing residential complex, as well as full access to classes in the College of Arts and Sciences. Recent graduates have designed degrees such as Urban Agriculture, Social Behavior Across Cultures, Neuroscience of Oneirology, Human Rights, The Art of Storytelling and Visual Culture.

Research in the Field
Discover the effects the historic California drought is having on the environment with paleo climatologist and assistant professor Hillary Jenkins in nearby mountains, forests and meadows. Learn about light pollution and see the Milky Way for the first time with physics and astronomy professor Tyler Nordgren. Spend time on a boat tracking whales and dolphins in the Pacific Ocean with professor Lei Lani Stelle. Our faculty are performing research in a multitude of topics. Explore and learn alongside them as you uncover important facts that may help the world.

13:1
STUDENT TO FACULTY RATIO
You’ll work closely with faculty advisors to investigate, experiment and find what inspires you most.

2ND OLDEST SCHOOL OF MUSIC in California
Passionate about music? The School of Music offers a conservatory approach within the liberal arts setting. Whether you are a music major or someone who simply can’t imagine life without it, you’ll have access to the same facilities and talented studio faculty. This will improve your technical abilities and ensure performance opportunities (and with 11 ensembles on campus, there are many).

Do you dream of becoming an executive or starting your own business?
Get ahead from day one by working with and learning from faculty-mentors who bring extensive firsthand professional experience to the classroom. Through their networks with major and niche companies, they’ll make sure you gain knowledge and know-how with plenty of practical, real-world experience.

Have fun. Stay fit. Win big.
Whether you want to lead the Bulldogs to another championship or make the mountains your playground, you’ll find what you need to indulge a full range of athletic pursuits.

Community Competition
More than 50% of Redlands students enjoy the thrill of competition in a thriving intramural and club sports program. Recent intramural leagues have included beach volleyball, flag football, tennis, soccer, basketball, spike ball and lifejacket water polo. Club sports compete both on and off campus at a variety of levels in soccer, Ultimate, lacrosse, volleyball, cycling, boarding, rock climbing and more.

70% of our varsity teams have been ranked in the top 25 nationally since 2009

50+ conference titles over the last decade

ACTIVE ADVENTURE

12 MILLION SQUARE FEET dedicated to athletic and recreational space

50 Outdoor Program volunteers leading expeditions

20 VARSITY PROGRAMS have been represented in the NCAA Championships in the past 7 years

6,750 seats in the football stadium
189 SCHOLAR-ATHLETES with a GPA of 3.5 or higher

14 individual national titles won by Redlands athletes in the last 10 years

UROUS ATHLETIC

Outdoor Programs
Ski on Big Bear Mountain. Backpack in Anza-Borrego. Surf at Newport Beach. Redlands’ close proximity to a range of terrains and our famous Southern California weather make the possibilities for recreational adventures endless. Outdoor Programs offers rental equipment for your own excursions, as well as 50 group trips each year. All that’s left to do is sign up.

NCAA DIVISION III TEAMS

MEN
Baseball • Basketball • Cross Country • Football • Golf • Soccer • Swimming and Diving • Tennis • Track and Field • Water Polo

WOMEN
Basketball • Cross Country • Golf • Lacrosse • Soccer • Softball • Swimming and Diving • Tennis • Track and Field • Volleyball • Water Polo
The skills you’ll develop at Redlands are the same ones prospective employers and graduate schools seek:

- **Analytical thinking**
- **Problem solving**
- **Creativity**
- **Entrepreneurism**
- **Leadership**
- **Teamwork**
- **Interpersonal communication**

The goal is to graduate and get a job or go on to grad school. Forbes ranks Redlands in the top 5% of all colleges in the nation for the great career prospects of alumni, high graduation rates, competitive national post-graduate awards and low levels of debt for graduates. And while we wouldn’t necessarily equate success with income, it’s still good to know The Economist places Redlands in the top 7% of all four-year colleges for having a positive impact on alumni earnings. Want to hear the real story? Read about the successes of our recent alumni.

**ANTHONY DIMARTINO ’11**  
California Assembly Fellow, Sacramento

Through my participation in social justice organizations like Fidelity Isonomy Erudition, I began to see that it was possible for anyone at any age to be a change agent. What I’m doing with my life today—advocating for statewide policies to build healthy and safe communities—is directly correlated to my Redlands experience.

**MAGGIE LEHR ’15**  
Economics and Political Science majors

The coursework at Redlands equipped me to approach problems critically to find solutions. As a member of the lacrosse team and captain of the mock trial team, I learned how to work effectively with others to achieve a common goal. My current position calls on me to do these same things every day: to work with my colleagues to streamline and improve processes related to accomplishing our mission.

120,000+ **HOURS PER YEAR**

Spent by our students devising and implementing solutions to local, national and global problems—it’s no wonder we have been on the President’s Higher Education Community Service Honor Roll with Distinction.
SUCCESS

AFTER REDLANDS

KELSEY MYERS ’01
Emmy Award-winning producer, CBS News, Los Angeles

EMMY AWARD-WINNING PRODUCER

KELSEY MYERS ’01
Johnston Program emphasis in Media Studies

Nearly 90% of our recent grads were employed or pursuing an advanced degree one year after graduation.

ERIN MINCKLEY CHLAGHMO ’04
Artist, teacher and founder of Relativity Textiles, Chicago

Redlands’ interdisciplinary approach to learning gave me the freedom to focus on a lot of different things but also made me resourceful. I got to come up with a plan to take advantage of all the opportunities—from what courses to take, which professors to work with, where to study abroad and more. Learning to think for myself and be imaginative as well as practical has empowered me to accomplish my dreams, including running my own company today.

My Redlands education was exceptionally active, and I was encouraged to go out into the real world to practice my craft. The experiences I gained from working on the campus paper and having a byline at the LA Times to interning here and abroad with national networks bolstered my confidence and my résumé. I graduated equipped to succeed and continue to use my Redlands education every day in my professional life.
A PLACE TO CALL YOURS
Students find the city of Redlands to be a perfect college town.

Redlands was recently named a “Great So Cal College Town” by AAA Westways Magazine. The small-town charm within a city is just a short bike or free shuttle ride from campus. You’ll find yourself enjoying a cup of coffee during finals at Augie’s Coffee House, savoring one of the over 70 pizza combinations at Gourmet Pizza Shoppe or indulging in a bowl of liquid nitrogen ice cream from à la minute. Historic homes, America’s longest continuously running summer music festival with no admission charge and beautiful parks make the city of Redlands a one-of-a-kind gem in the Southern California region. The University’s close ties to nonprofit organizations and local businesses, including Amazon and Esri, the largest geographic information systems mapping software company in the world, make it a great place to land an internship or get involved with community service.

**Beautiful parks & hiking spots where the view will always be spectacular**
