

JNST-000K: Data Storytelling  
Professor: Nate Cline  
M/W 1:15-2:30

This course will cover some programming (R and Python) if students are interested, but mostly it would be a project based course with sections on data construction, graphics/infographics, data sculptures/media, narrative construction, mapping, and games. Along the way and depending on student interest we may branch out to data sonification, data representations in theater, and so on...
