THE PROGRAM
The program in Biochemistry and Molecular Biology is designed to prepare students for careers in biochemistry and molecular biology, in the related fields of cell biology, microbiology, molecular genetics, or in the health sciences. Students who satisfactorily complete the following courses receive a bachelor of science degree with two majors, one in biology and one in chemistry.

Students who intend to major in the program in Biochemistry and Molecular Biology must file an “intent to major” form with the secretary of the departments of Biology and Chemistry at the time they declare their majors in Biology and Chemistry. This form must be signed by the student and a program advisor from each department.

Learning outcomes for this program may be found at www.redlands.edu/BS-BIOC/learningoutcomes.

BACHELOR OF SCIENCE

DEGREE REQUIREMENTS
The Biology Department requires each major to submit a contract to the department listing the courses that will be used to complete the degree. Degree contracts must be approved by the end of the second semester of the junior year or, in the case of upper-division transfer students, the end of the first semester of residence.
